

BSF Octane Booster

Product Sheet

BSF Octane Booster is a special anti-detonating concentrated additive, developed to increase the performance of fuel and thus optimize the efficiency of the motor.

ADVANTAGES

- Increases the number of octanes in the gasoline (anti-detonating power)
- Permits a controlled and more uniform combustion
- Reduces motor pinking, advance ignition and post-ignition occurrence
- Improves motor performance

BSF Octane Booster is a professional product, specially developed for racing motors with a high compression ratio.

DIRECTIONS FOR USE

In function of the wished performance, blend with gasoline to the extent of 3-5 per thousand.

The increase of the number of octanes depends on the type of gasoline used.

STORAGE

Store in original closed packaging, store indoors, away from moisture, from direct exposure to sunlight and weather. Avoid continuous and excessive temperature changes.

WARNING: the product is photosensitive, avoid exposure to light and air.
